**OPPOSITION TO 18+ YEARS
OF FCC NONFEASANCE**

. . . The two FCC commissioners, - including new Trump Chairman Commissioner Ajit Pai, -are trying to keep free pornography broadcasting by wire and radio around though illegal by twisting FCC Administration rules to allow HUGE ISPs with 250,000 clients to be exempt from being honest about eavesdropping on traffic histories and illegal sales of customer profiles.

. . . . I could write a featured op-ed and/or encourage-d NYT to look into doing this. See the following for filed but IGNORED docs - not op-ed styled but styled very close to Eighth Circuit Court legal filings:

. . . Trump Chairman Commissioner Ajit Pai did not need confirmation by the senate recently because of an existing 5-year term not expiring till May. Republicans may or may not dislike broadband user privacy and may or may not be addicted to free broadband pornography. Determinations to quietly propagate communication crimes with a voice-vote to confirm another unelected five year term for anti-consumer pro-Verizon Chairman Commissioner Ajit Pai in May is likely now planned

. . . Trump Chairman Commissioner Ajit Pai is the privileged son of wealthy Indian immigrants and appears to prefer his prior employer, Verizon Inc, to protecting the privacy and safety of broadband users, **including children** and fake news influenced voters.

. . . This s one of the principle reasons the FCC was created in 1934 besides covering America with radio stations and a network of interconnected telecommunication wires that were called the "*unique and wholly new medium for worldwide human communications*" by the mistake of a senile SCOTUS oligarchy in 1997. The now VOID SCOTUS FIAT of *Reno v ACLU* (96-511) was nineteen years after creating the fictitious "airwaves" medium, which does not exist except as a figure of speech and will NEVER exist as a physical medium but remains the non-medium fiction created in in *FCC v Pacifica* (1978).

. . . Lord Most Honorable John Paul Stevens wrote the majority opinion striking down the Communications Decency Act and ensuring that the "*open nternet*" improperly had robust First Amendment protections; -first called improper *indulgences* on a Castle Wittenberg Church doorway on October 31, 1517. Seems it took only 480 years or so for a warped judicial theory of free access to pornography to repeat itself.

. . . This now VOID FIAT created free online pornography on the "*open nternet indulgence*" calling this culturally senile mistake a "*unique and wholly new medium for worldwide human communications*", which everyone with adequate intellect knew was VOID since 2000 or before. Duh...

If you are under 18, or are at work, or should not look at naked women; be sure you "*clear or erase*" browser history afterwards. Your ISPs believes browser history privacy is not protected by any law and may be used for profit though you think these will hide. Chairman Commissioner Ajit Pai and Commissioner Michael O'Rielly represent ISPs and ARE NOT REPRESENTING YOU.

Respectfully, .
